## 2024\_28\_III\_OOPS Using Java Lab

### 2028\_REC\_OOPS using Java\_Week 1\_Q6

Attempt : 1

Total Mark : 10

Marks Obtained : 10

#### **Section 1 : Coding**

##### **1. Problem Statement**

Joey is learning about bitwise operations and is working on a project that involves extracting specific bits from integers. He needs to write a program that takes an integer and the number of bits N as input and outputs the value of the lowest N bits of the integer.

Help Joey in his project to understand and visualize how bitwise operations work in practical scenarios.

##### ***Input Format***

The first line of input consists of an integer X, representing the given integer.

The second line consists of an integer N, representing the number of bits to extract.

### ***Output Format***

The output displays "Result: " followed by an integer representing the value of the lowest N bits of the given integer.

Refer to the sample output for formatting specifications.

### ***Sample Test Case***

Input: 85

2

Output: Result: 1

### ***Answer***

```
import java.util.*;
class main{
    public static void main(String args[]){
        int a,b;
        Scanner obj=new Scanner(System.in);
        a=obj.nextInt();
        b=obj.nextInt();
        System.out.printf("Result: %d",a & ((1 << b) - 1));
    }
}
```

***Status : Correct***

***Marks : 10/10***
